

DXC - KidosCare

Brief Description:

A kidos care is a online shopping website where sellers can sell their baby products and buyers can buy their products.

Problem Statement:

The baby product market is now popular everywhere. If parents want to buy any baby product online, they can connect with us and we have to provide a service to buy their interested products.

Two major roles :

1. Sellers can sell their products.
2. Buyers can buy their products.

In this application, breast pumps, front-facing baby carrying straps, and baby bouncers are especially popular products to sell.

Core Problem:

It is a Baby Product Oriented ecommerce Website which automate end to end marketing activities which includes wide varieties of baby Products as per the Parent's choice with attractive deals & offers.
