# DXC – FitMyJob

**Brief Description:** This product is of particular interest to those of you who are searching for job opportunities. This trait makes it easier for job seekers to decide on a specific career. Equally, it would be easy for recruiters or hiring managers to verify job applications online.

**Problem Statement:** As we all know the busy lifestyle of this modern generation, there seems to be no end to the demands of our time and looking for a job is just one more. So, how do you search for a job in this busy schedule?

There are various challenges which are present in the market:

- Insufficient time for searching for a job.
- You don't have a proper connection in that specific field in which you are searching for a job.
- Not having proper guidance about Where and When to start.
- Not aware about the job openings, etc.

Build an online system which mainly focuses on the job hunters to get a best job based on the qualifications, city and skillset.

**Core Problem:** The problem of online job seekers applying for jobs so they can get jobs according to their interests.
